SUMMARY

Detail-oriented First-year Engineering student with a strong foundation in Python, database management, and software development. Eager to apply data-driven problem-solving and debugging skills to an IT/QA Testing role, ensuring rigorous system validation and reliable software performance.

EDUCATION

Western University (UWO) <i>B.Eng Undergraduate (General First Year)</i> Received a Western Admission Scholarship for a 90% Top 6 average	London, ON 2025–2030
Victoria Park Collegiate Institute <i>Graduated with the I.B. Diploma and OSSD Diploma</i> - Received Ontario Scholar Award - Graduated with 90% average	Toronto, ON 2021–2025

WORK EXPERIENCE

Camp Counselor <i>The Neighborhood Organization</i> - Performed data entry to maintain and update camper information databases - Managed camper conflicts and worked to ensure a safe and inclusive environment	Toronto, ON Summer 2025
Community Development Worker <i>The Neighborhood Organization</i> - Structured a pamphlet of over 25 community resources for distribution - Managed client data logging and appointment scheduling operations using Microsoft Teams and Outlook	Toronto, ON Summer 2024

PROJECTS AND EXTRACURRICULARS

Reddit/Yfinance Stock Sentiment Analysis and Prediction Algorithm <i>Developer</i> - Built a data science pipeline utilizing Python, pandas, and yfinance to aggregate and validate financial datasets - Utilized Postman to execute comprehensive API testing on FastAPI endpoints, validating data payloads, verifying HTTP response codes, and ensuring robust backend functionality - Trained, tested, and evaluated a Random Forest algorithm using scikit-learn to validate model accuracy for price prediction - Conducted integration testing between a React front-end and a FastAPI backend to ensure reliable data rendering - Github: https://github.com/SrivP/stock_sentiment_analysis	Toronto, ON 2025
Robotics Club VPCI <i>Programmer</i> - Debugged and performed QA testing on computer vision code to accurately process webcam telemetry and driver hub outputs - Refined Java codebase through iterative testing to ensure the reliable operation of servo and motor hardware	Toronto, ON 2022–2024
Robotic Arm Project <i>Developer</i> - Tested and troubleshoot C++ control logic and hardware integration for a 6 DOF robotic arm - Validated websocket connectivity and latency between a React interface and an ESP32 microcontroller - Github: https://github.com/SrivP/robot-arm-l20	Toronto, ON 2026

TECHNICAL SKILLS

Industry Software: OnShape, Microsoft Office Suite (Excel, Word, Teams, Powerpoint)
Programming Languages: Python (pandas, scikit-learn), Java, SQL, LaTeX, React.js, Tailwindcss, React Native
Tools and Platforms: GitHub, VS Code, Overleaf, Postman, Linux (Environment Configuration/Waybar)
